

REACH NEW CUSTOMERS

GUIDELINES & REQUIREMENTS
FOR DIRECTORY LISTINGS

Minnesota Grown members are varied and unique. The Minnesota Grown Directory is designed to help you reach customers interested in directly buying local, no matter your business model! This guide will help to understand directory listing **content requirements**, **style requirements**, and **key questions** customers may have.

Minnesota Grown reserves the discretion to modify listings to meet requirements and delay posting directory listings until they meet the requirements. To reduce posting delays, staff may automatically modify posts to meet style requirements. For content discrepancies, Minnesota Grown may refrain from posting a listing and reimburse the listing cost if an agreed-upon modification cannot be found.

Please e-mail any questions, concerns, or clarifications to mngrown.mda@state.mn.us

Content Requirements

The Minnesota Grown Directory is focused on direct-to-consumer sales. (If selling wholesale, please check out our [Wholesale Directory](#).) Businesses and markets listed in this direct-to-consumer directory should:

1. Be selling direct to the final customer of your product (e.g. online sales, farmers market, CSA shares, etc.)
2. Be selling product(s) that are at least 80% grown/raised in Minnesota by your business; be a farmers market with vendors who grow/raise product in Minnesota; or be a business creating a value-added product from ingredients that are 80% grown/raised in Minnesota.

(Note: Wild rice must be 100% grown/raised in Minnesota by your business to be listed in the directory)

All listings are limited to **460 total characters** (includes spaces and punctuation).

Listings should focus on your business/market practices, rather than broad claims.

Regulated Market Claims. The food world is full of marketing claims, many of which are regulated and need to be accurate/verifiable. Many words such as “lean”, “low-fat”, “high-protein”, and “organic” have legal definitions. Other product claims such as “no-hormones” or “no-steroids” may not be used when describing meat, poultry, and seafood. If you are uncertain about the legality of wording for your directory listing or labeling, please call MDA’s Food and Feed Safety Division at **(651) 201-6272** for clarification.

“Product Types” are the way customers search our directory. You may **only select product types for items that you grow, raise, or create** from Minnesota Grown agricultural products. Select all product types that apply for your online listing. Of your online product types, **select 5 for your listing in the printed version of the directory**. Consider selecting your most notable or highest value products.

Version 2020.09.15 These requirements & guidelines are subject to change. Please contact mngrown.mda@state.mn.us for specific questions regarding your individual listing.

Product Types Requiring Certifications, Licenses, or Program Participation

Hemp. Producers selecting hemp as a product type must be a currently licensed member with the MDA Industrial Hemp Program: <https://www.mda.state.mn.us/plants/hemp>

Farmers Market Nutrition Program (FMNP). This can only be selected by farmers markets or winter farmers markets who are registered with FMNP: <https://www.mda.state.mn.us/food-feed/seniorfarmers-market-nutrition-program>

Milk and Other Dairy Products. Persons selling milk and other dairy products should have reviewed the MDA Dairy Inspection Program information and be following any requirements for their farm: <https://www.mda.state.mn.us/food-feed/dairy-minnesota>

Minnesota Ag Water Quality Certified (MAWQC). This product will only be given to businesses who are certified by the MAWQC program: <https://www.mda.state.mn.us/environment-sustainability/minnesota-agricultural-water-quality-certification-program-1>

Certified Organic. Certified organic is a regulated market claim based on the USDA's National Organic Standards. Our "Certified Organic" product type will only be given to businesses whose certification is up-to-date and have been certified through an accredited body. Only members who are certified organic can use that term in their directory listing text. All members requesting "Certified Organic" as a product type should e-mail their most recent certification to mngrown.mda@state.mn.us. This will be cross-referenced against the USDA Organic Database: <https://organic.ams.usda.gov/integrity/>.

Minnesota Ag Water Quality Certified Farm is one of the certifications you can select for your directory listing if you are up-to-date on your certification.

Nursery Stock Growers and Dealers. Persons selling nursery stock must have a valid MN Nursery Stock Dealer or Nursery Stock Grower certificate through the MDA. They must sell only certified nursery stock and provide verification of certification: <https://www.mda.state.mn.us/plants-insects/nursery-certification-and-plant-regulation>

Other Unique Product Types

Farmers Markets. Members can only use the "Farmers Market" product type if your market includes multiple growers selling their own products. Two additional product types available to farmers markets are "Winter Farmers Market" and "Farmers Market Nutrition Program". Markets whose Winter Farmers Market(s) are at a different location than their regular market must purchase an additional listing.

Similarly, businesses such as nurseries or garden centers who host a farmers market on site - in addition to selling their own Minnesota Grown products - are required to purchase two listings: one for the farmers market and one for their business.

Do not select all product types that customers can find at your market (ex. sweet corn, bakery products), since these are reserved for individual business. You may describe the types of items customers will find at your market in the body of your directory description.

CSA Farms. The "CSA Farm" product type will be used - instead of individual products – unless the CSA farm *also* sells items directly to customers who are not members of the CSA. For example, if you are a vegetable CSA but also sell chicken to non-CSA-members, you may select "CSA Farm" and "Chicken" as your product types.

Style Requirements

Refrain from using all-caps.

Use hyphens between phrases like cut-your-own and pick-your-own for clarity.

Version 2020.09.15 These requirements & guidelines are subject to change. Please contact mngrown.mda@state.mn.us for specific questions regarding your individual listing.

Phone numbers are ideally not repeated in listings since they show directly above listings in online and printed versions.

Space-saving Shortenings

Minnesota Grown uses shortenings on all directory listings to maximize the listings space available to you. Exceptions may be made if needed. Please reach out if this is the case for your business.

Open hours. Month-Month: day time, day time. (Ex: *Nov-Dec: Mon-Fri 8a-5p, Sat 11a-3p, Sun 5-7p.*)

Months. All months will be shortened to three letters, except July and June. (Ex: *Mar, Apr, Sep, Oct*)

Days of the week. All days of the week will be shortened to three letters. (Ex: *Mon, Tue, Wed, Thu*)

Time. Hours will be listed as a single number (without colon, additional zeros), unless needed for clarity. A single “a” or “p” will be used instead of AM or PM. “Noon” may be used for clarity. (Ex: *10:30a-1:30p, 9a-1p, 10a-Noon*)

Other shortenings will be used where commonly understood by the public. (Ex: *hrs* (hours), *wk* (week), *wknd* (weekend), *yr* (year), *lb* (pound), *mkt* (market), *pls* (please))

Maximizing your Listing Description

Answering these four common questions with your listing information will help potential customers purchase from you!

What do you sell?

Product Types must be items members grow/raise/create from agricultural products themselves, but additional items may be mentioned in listing text:

“We make artisan farmstead cheese on our central Minnesota family dairy farm”

“Tours & private events are available year-round.”

“Gifts, candy, and decorations can be found in our on-farm holiday store.”

What makes your product(s) unique?

Set yourself apart from the crowd by mentioning features unique to your business/market.

“We specialize in 8 University of Minnesota varieties, including Honeycrisp, Zestar! & SweeTango.”

“Our crops, pasture, produce, and herbs are certified organic.” (See Content Requirements section for more info on using the term “certified organic”.)

Do we share a mission/values?

Customers “buying local” for a wide variety of reasons. Be sure to include info that will help people match their values to your mission and/or values:

“We are a CSA farm that provides meaningful employment to individuals with special needs!”

“Our farm focuses on restoration of soil, protection of water, and humane treatment of livestock.”

How can I buy from you?

Now that they’re interested, don’t forget to tell your customers how to take the next step:

“Call ahead for picking hours and weather conditions.”

“Shop our website or call for more information.”

“Find us at the Blaine Farmers Market: July-Oct.”
